NATURE INSPIRED DYNAMICS

NATURE INSPIRED DYNAMICS

The Orca chair introduces a unique guest seating concept that promotes dynamic, multipositional seating. Designed to accommodate various seating positions, Orca encourages users to change posture naturally, making it ideal for both mobile computing and meeting environments. Its versatility ensures comfort across a range of activities, whether it's for short meetings or longer work sessions, all while maintaining a sleek and functional design.

What sets Orca apart is its innovative redefinition of traditional chair elements. The backrest and the wrap-around armrest merge into a unified structure, allowing for sideways sitting positions and enhancing user flexibility. This seamless integration of form and function makes Orca not just a chair but an adaptable seating solution, perfect for the modern, dynamic workspace.

Design: Gecco Vision / Henner Jahns

Versions:

UN2603-1BU

UN2603-2B

UN2603-3B

UN2603-1WU

UN2603-2W

UN2603-3W

Features:

- An office chair which design made in USA
- Backrest available in with or without upholstery
- The seat cushions are available in a regular version and a rounded-edge version
- The circular control handle enables the seat height to be adjusted at any position.
- The integrated mechanism enables the backrest and the seat cushion to be independently rotated and adjusted.
- The unique design of the backrest enables it to possess the characteristics of armrest
- With stepless seat height adjustment, the chair can be perfectly tailored to different body sizes
- The elegantly shaped, sturdy plastic base emphasises the modern look
- The cantilever or four legged version also follow the basic design principle of the range
- Fitted with activated mechanism that follows the movement of the body, helping users easily turn around during the meeting without having to move their chairs, eliminating annoying noises and allowing them to focus on the meeting content.
- The generously padded seat surface offers exceptional comfort. The particularly robust fabric cover by Danish premium manufacturer Gabriel stands for durable Scandinavian quality (100% polyester, Martindale abrasion test: 200,000)
